

3B-the fibreglass company, Norway's export champion 2017

Battice (Belgium), 8 May 2017

Export Credit Norway has awarded 3B-the fibreglass company, member of the Braj Binani Group, its export prize for 2017. Among 80 companies operating in Norway 3B stood out, based on 4 main criteria:

- a high percentage of export,
- value creation in Norway,
- sustained success over time,
- innovation.

This award further strengthens the position of 3B as a major player in the green industry value chain. "We are very proud of this prize, and we want to thank our customers for their trust, our employees for their dedication and engagement, and Export Credit Norway", says Marc Hubert, CEO of 3B.

As a leading developer and supplier of fibreglass products and technologies for the reinforcement of thermoplastic and thermoset polymers, the company focuses on automotive and wind applications. As such, all our innovation programs are driven by the challenges that these green-oriented industries are facing. In Norway for instance, the company operates a unique eco-responsible and high performance glass technology, HiPer-tex™. This well established brand combines durability with eco-responsibility and versatility, making HiPer-tex™ the material of choice for a wide range of industries, among which the wind industry and more specifically windmill turbine blade manufacturers. With a sound foundation of unique assets in Belgium, India and Norway and some 1,000 staff members, 3B is committed to designing reliable and durable glass fibre solutions available globally.

HiPer-tex® is a trademark of 3B
